

# Land Conservation

The island has over 22 miles of nature trails that feature wild sea island cotton, rocky crags and cliffs, wild orchids and views of other Grenadine islands.

## Permaculture Gardens

At the top of Rutland Bay you can find a 2 acre community garden which is open to everyone. There have been training workshops over the years, and as a result, we practice permaculture principles and organic gardening as much as we can around the island. There are individual gardens at many of our villas.

## Mangroves

Mustique has some of the largest mangrove reserves in the Grenadines, second to Union Island. These are home to a rich and diverse bird population, as well as a healthy crab population.

## On-going beach clean ups

As part of our conservation program we undertake on-going beach clean ups which monitor marine debris, collect Sargassum from Macaroni beach and maintain our beautiful shores.
