

Responsible Products & Purchasing

Plastic & Paper Bags

As part of our commitment to reduce our waste, there are no more paper or plastic bags available at the Depot and Coreas Supermarket.

Cotton House Restaurants

All restaurants are using biodegradable packaging and paper straws; all laundry products are eco friendly; coffee pods are compostable and ethical; and sunscreen sold on site does not contain oxybenzone*.

Green Products

We wish to provide our guests and local residents with the opportunity to make sustainable purchasing choices. Therefore, the Depot is now stocking alternative green products, specifically cleaning brands. Additionally, in order to protect our both our land as well as our marine ecosystems we have banned products with microbeads and sunscreen with oxybenzone*.

* Oxybenzone- a chemical that kills coral.

Local Produce

Chef Elio at the Cotton House sources and offers local as well as seasonal produce. The fish is sustainably caught within Grenadine waters, with the aim of having low food and carbon miles. Additionally, he is using chicken and pork farmers in St. Vincent, who are now supplying free range meat and eggs to our restaurants.
